

6516209157.txt

I am a subscriber to XM Satellite Radio and benefit from the diverse programming that it offers, including its traffic and weather channels. I subscribe to satellite radio because the quality of programming on the AM and FM broadcast channels in my listening area and travelling areas are inadequate and lack diversity quality programming. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what you are permitted to hear. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that it offers and I pay for.

Thank you,

Joe Dawley
